

HERD ABSURD!

A hilarious mix and match game for kids ages 2 and up.

They say, never work with kids or animals. Well Tinybright has defied the odds to bring you one of the most entertaining Apps ever! Kids can be as creative as they like, mix and matching animated animals that not only look hilarious, but sound funny too!

Herd Absurd encourages kids to explore each animal combination by poking and prodding different body parts to see what happens. With thousands of possible animal combinations and over 150 animations and sound effects... it's guaranteed to get some giggles!

It also provides a challenge to collect all the animals, learning shape and color matching along the way. Kids can play however they like, depending on their skill level.

Features:

- Retina enabled artwork, made with love and attention to detail for iPad and iPhone
- Ages 2 and up
- Free play and challenge play means kids can participate according to their age and skill level.
- Every part of every animal can be poked for funny sounds and animations
- Kids can choose their favorite colored blocks to play with
- Over 150 animations & custom sound effects
- Over 2700 possible animal combinations
- Sounds and music can be turned on/off
- We do not collect any personal information or include in-app purchases (your kids are going to spend enough of your money when they're teenagers).
